End-to-End System Manual & Testing Execution Guide

1. QUICK START & EXECUTION

Run the following commands in PowerShell inside the directory:

```
cd "C:\Users\nrgam\OneDrive\Documents\Desktop\Internship project"  
python -m streamlit run app/frontend.py
```

2. RUNNING AUTOMATED UNIT TESTS

Execute the complete pytest unit testing suite covering APIs, DBs, and ML models:

```
python -m pytest tests/test_system.py
```

3. EXPORTING POWER BI DATASETS

Generate Excel (.xlsx) and CSV (.csv) datasets for Power BI Desktop:

```
python export_powerbi_dataset.py
```
